## Definition of File Naming Rule

Refer to "Operation Environment Development Guideline" for items not mentioned in the naming rule of web design image file.

### Image type classification code

Use the following format in naming files, in accordance with the usage of the image file.

Image Types	Form
bt	Button Image
bul	List-item Marker
Img	Image
img_event	Image for event pages
txt	Text Image
title	Image for title
title_s	Image for small title
ttitle	Image for table title
tab	Image for Tab Menu
topmn_	Image for Utility Menu(Top, Main)
bttmn_	Image for Bottom(Bottom)
ban_	Banner Image

※ The file types above can be changed during screen configuration.

## File Naming Rules

All file names must be written in small-case letters. Files are named according to the subsystem code, file type, and serial number. (This guideline is a sample; changes to the following may be made in accordance with the user's development environment.)

[subsystem code]\_[image type]\_serial number

- ex) bbs\_title\_001
