

Label / Text

Label/Text uses HTML's <h1> and <p> tags and define CSS to change colors, sizes and fonts.

Base Code

Label

<h1> Tag is used to show document title and important parts.

<h2> Tag is used to show secondary sections and less important part than the <h1> tag.

It is recommended that you be start with <h1> and reduce the header levels based on importance as in the following.

H1 Heading

H2 Heading

H3 Heading

H4 Heading

H5 Heading

H6 Heading

```
<h1>H1 Heading</h1>
```

```
<h2>H2 Heading</h2>
```

```
<h3>H3 Heading</h3>
```

```
<h4>H4 Heading</h4>
```

```
<h5>H5 Heading</h5>
```

```
<h6>H6 Heading</h6>
```

Text

Use HTML's <p> and <div> tags to define CSS to change colors, fonts and sizes.

Use the style sheet to change the text arrangement.

left
center
right

```
<div class="egov-align-left">left</div>
```

```
<div class="egov-align-center">center</div>
```

```
<div class="egov-align-right">right</div>
```
