# Installing CLI Tools for Windows

## Outline

Download the NPM Tools of NodeJS to use CLI Tools for Windows.

## Description

You can add a project using PhoneGap Cordova CLI and administer the platform and PhoneGap plugin. Note, however, that you can develop in the Android platform only for Windows, contrary to OS X where you can develop in both Android and iOS platforms.

Download NodeJS CLI Tools

### Download and Install NodeJS

Run `nodejs.org`, click on install to commence download.

□ LINUX FOUNDATION COLLABORATIVE PROJECTS

node.js

Node.js® is a platform built on **Chrome's JavaScript runtime** for easily building fast, scalable network applications. Node.js uses an event-driven, non-blocking I/O model that makes it lightweight and efficient, perfect for data-intensive real-time applications that run across distributed devices.

Current Version: v0.12.5

**INSTALL**

DOWNLOADS | API DOCS

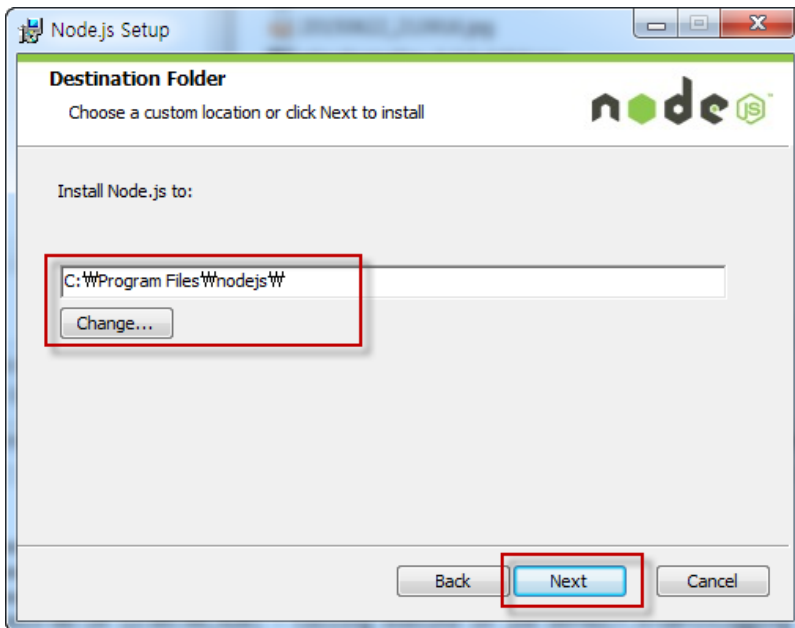

In Finder, go to the directory where you have downloaded and run node-v0.xx.x-x64.msi.

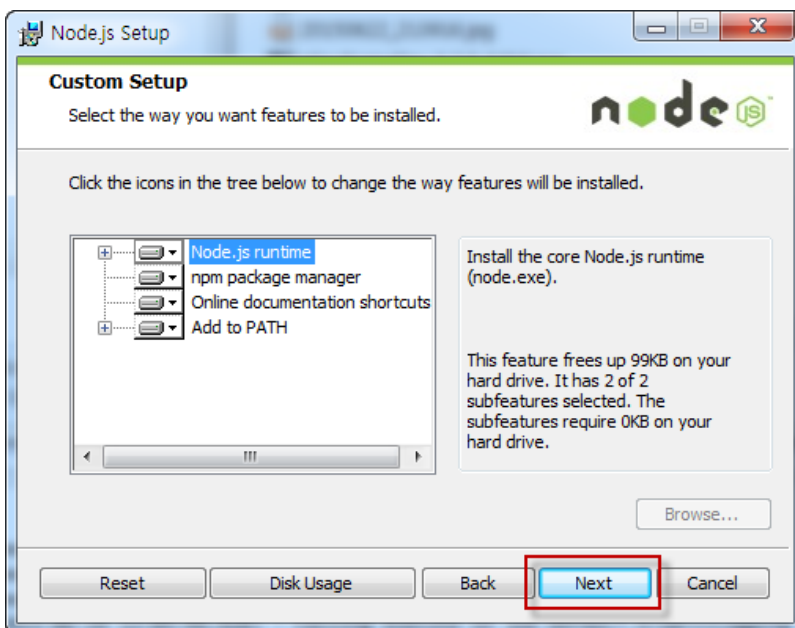

Click on Next to move on.

Check the directory and click on Next to move on.

Click on Next to complete your installation. The default directory is C:\Program Files\nodejs.

Install Cordova CLI Tools

**Install Cordova CLI Tools using NPM command.**

Install Cordova CLI Tools using NPM command as follows:

```
C:\> npm install -g cordova
Update Cordova CLI
```

```
C:\> npm update -g cordova
```

**Check Cordova CLI information**

```
C:\> npm info cordova  
Add a Project
```

```
C:\> cordova create hello com.example.hello HelloWorld
```
